Education

North South University

Dhaka, Bangladesh

BS in Computer Science and Engineering

Bir shreshtha Munshi Abdur Rouf Public College

Dhaka, Bangladesh

Higher Secondary Certificate

Skills

Programming Languages: C, C++, Python, JavaScript, SQL

Automation & Testing Tools: Playwright, Selenium, Postman, Jira, TestRail, Git, GitHub

Frameworks & Technologies: Node.js, MySQL, MongoDB

SQA Methodologies: SDLC, STLC, Agile/Scrum

Testing Types: Functional Testing, Regression Testing, Smoke Testing, Acceptance Testing

Test Management: Test Case Design, Bug Reporting, Defect Lifecycle

Teaching & Mentoring: STEM Education, Technical Instruction, Coding Mentorship, Project-Based Learning

Projects

Automation Testing Project [↗](#)

- Automated the full SauceDemo user journey, from secure login and cart management to final purchase verification.
- Built a scalable framework using WebDriverIO, the Page Object Model (POM) for cleaner, reusable code.
- Implemented multiple test scenarios to validate functional UI elements, price calculations and edge-case login behaviors.
- Integrated Allure Reports to provide detailed execution logs, trend graphs and failure screenshots.

Manual and API Testing Project [↗](#)

- Performed manual and API testing on an e-commerce demo application.
- Designed and executed test cases for search, cart and UI functionalities.
- Validated API endpoints using Postman and reported defects with clear documentation.

Manual Testing Projects in Internship

- Performed manual testing on Calculator Menu, Log in Form FB Application, Burger Shop, Roombridge Demohoster, Gregory Olsen.

Work Experience

alqa

Dhaka, Bangladesh

QA Functional Engineer Intern

- Performed manual testing on web and mobile applications, including functional, smoke and regression testing to ensure product quality.
- Designed and executed test cases based on project requirements, acceptance criteria.
- Identified, documented and tracked defects using Jira, following the defect lifecycle, supporting defect validation.
- Used Chrome DevTools, Charles Proxy, Fiddler to analyze network requests and debug application behavior.
- Prepared test documentation, quality reports, acceptance sheets to support the QA process.

Ostad

Dhaka, Bangladesh

Trainee

- Experienced in the STLC process, including requirement analysis, Test Plan/Case design, defect management using Jira and Trello within Agile/Scrum frameworks.
- Built UI automation frameworks with Playwright (Page Object Model), Selenium and automating REST APIs using Postman (Scripts/Assertions).
- Technical skills include JavaScript, Node.js, version control via Git/GitHub; performed database testing with SQL (MySQL) and NoSQL (MongoDB).
- Skilled in problem-solving through pseudocode, analyzing system architecture and validating data flow to ensure software quality and performance.

Certifications

Data Science -NSU [↗](#) by Professor Widom (Dean, Stanford University)

Awarded the SheSTEM Scholarship - 10MS) [↗](#) by the Kingdom of the Netherlands)

SQA Workshop [↗](#) by 6Sense HQ)

Data Analytics with SQL [↗](#) by Grameenphone Academy)

SQA: Manual & Automated Testing [↗](#) by Ostad)

Teaching & Mentoring: [↗](#) by Caretutors)
